Construction Management

# Construction Management

A property that is past its prime is often in need of restoration. We determine this on the basis of a comprehensive analysis of the building condition. We can gladly show you detailed measures to enhance your property. Our tried-and-trusted services include building planning and execution. We retain the overview for you and monitor the costs.

## Our services for you

- Analyses of a building's condition
- Energy optimisation measures
- Execution of renovations and restorations
- Construction project management and overall management in accordance with SIA 102 and SIA 112
- Building client support and consulting

## Benefit from

- Qualified and committed employees
- Advanced and intelligent IT solutions
- In-depth market and technical knowledge
- Our employees knowledge of building projects with occupants
- Closeness to the customer – for us, this also includes closeness to our existing residential and commercial tenants
- Active interdisciplinary cooperation with our property management as well as letting management and brokerage divisions
